NanoBRET™ TE Intracellular Kinase Assay

PKMYT1 TE Assay

Assay Format: ADH (1)  
NanoBRET™ Tracer: K-10 (2)  
100X [Tracer]: 100μM in DMSO  
Final [Tracer]: 1μM  
Assay Category: Medium Window (3)  
Z': 0.74

Materials Needed

- PKMYT1-NanoLuc® Fusion Vector (Cat.# NV1871)  
- Transfection Carrier DNA (kit component; 2)  
- NanoBRET™ TE Intracellular Kinase Assay, K-10 (Cat.# N2640, N2641, N2840; 2)

Example NanoBRET™ Tracer K-10 data in HEK293 cells transiently expressing PKMYT1-NanoLuc®

Top Left Panel: Overview of the NanoBRET™ TE Assay. Other Panels: HEK293 cells were first transfected with PKMYT1-NanoLuc® Fusion Vector and Transfection Carrier DNA (1 to 9 transfection ratio) and then were subsequently resuspended in OptiMEM prior to seeding into 96-well plates: Top Right Panel: Tracer affinity was measured by treating the cells with increasing concentrations of tracer in the presence or absence of a molar excess of unlabeled compound. Bottom Left Panel: The apparent cellular affinity of the unlabeled compound was measured at multiple fixed concentrations of the tracer, where the IC50 at the recommended tracer concentration is depicted in orange (4). Bottom Right Panel: An example compound profiling experiment at the recommended tracer concentration is provided.
NanoBRET™ TE Intracellular Kinase Assay

Notes:

(1) This assay is run in the adherent format. See the NanoBRET™ TE Intracellular Kinase Assay, Adherent Format Technical Manual (#TM598) for protocol details.

(2) NanoBRET™ Tracer K-10 is supplied within the NanoBRET™ TE Intracellular Kinase Assay, K-10 products (N2640, N2641, N2840). Additional assay components are supplied within these kits, including the NanoBRET™ Nano-Glo® Substrate, Extracellular NanoLuc® Inhibitor, and TE Tracer Dilution Buffer. Additionally, LIMK1-NanoLuc® Fusion Vector (as a control) and Transfection Carrier DNA are provided in products N2640 and N2641. Transfection carrier DNA products (E4881 and E4882) are also available separately. For full details, please see the Promega website or technical manual for these products.

(3) Assay category is defined by the assay window at the recommended tracer concentration. It is detailed in section 7.A within the NanoBRET™ TE Intracellular Kinase Assay, Adherent Format Technical Manual (#TM598).

(4) See section 5 of NanoBRET™ TE Intracellular Kinase Assay, Adherent Format Technical Manual (#TM598) regarding approaches to achieve quantitative analysis of test compound affinity.

(5) NanoBRET™ TE Intracellular Assays have also been applied to Residence Time analysis. For a kinase example, please refer to Forster, M. et al. For an HDAC example please refer to Robers, M.B. et al.
